

EMPOWERING TRUST. INNOVATIVE RESULTS.

Hydraquip, Inc., Division of Assembly and Distribution of Fluid Power Products Successfully Transitions to ISO 9001:2015 Certification

Houston, Texas – On September 15, 2017, a Hydraquip Inc.'s division, Central Green Power Solutions, joined an elite group of companies worldwide in successfully becoming certified by DNV-GL to the relatively new ISO 9001:2015 standard. Hydraquip Power Solutions initially received ISO 9001:2008 certification on September 16, 2011, prior to advancing to this new standard.

The new ISO 9001:2015 standard represents the latest in best practices for quality and operational excellence. The management system acts as a proactive tool, encouraging continuous improvement, while promoting risk-based thinking throughout.

Being among the few companies who have transitioned to this new internationally recognized standard ensures that Hydraquip Power Solutions will have the procedures in place to maintain cutting edge process integration, feeding a continual improvement culture and improve its customer satisfaction.

President of Hydraquip, Inc., Tim Nichols, stated, "The ISO 9001:2015 certification reassures our customers that we are an incredible organization committed to high standards of excellence while exceeding customer expectations. I am extremely proud of Hydraquip Power Solutions' successful transition to this improved standard."
